

Customer Success Playbook

Purpose

This playbook guides Customer Success Managers (CSMs) through the full district lifecycle — from onboarding through renewal. Use it to deliver consistent, data-driven engagement that maximizes family engagement scores, reduces churn, and grows account value.

1. New District Onboarding (Days 0–90)

Week 1–2: Technical Setup

- Schedule kick-off call with IT Director and Communications Director.
- Complete Student Information System (SIS) integration setup: PowerSchool, Infinite Campus, Skyward, or Aeries.
- Import family contact data; target 95%+ contactability within 14 days.
- Configure multi-channel delivery: SMS (primary), Email, App Notification, Push.
- Verify language translation is enabled for top languages in the district.

Week 3–6: Activation and Training

- Conduct role-based training: Superintendent overview (30 min), Admin power-user (90 min), Teacher quick-start (45 min).
- Send first parent-welcome message using the New Family Welcome template.
- Enable Attendance Alerts if district purchased Attendance Management module.
- Set up Emergency Notification protocol and conduct a test drill.

Week 7–12: Adoption Review

- Review Family Engagement Score in the ParentSquare Intelligence dashboard.
- Benchmark Contactability Score against similar-sized districts (target: 90%+).
- Identify top 3 teachers or administrators as internal champions.

2. Quarterly Business Review (QBR) Guide

QBR Objectives

QBRs should be held every 90 days with the district's executive sponsor (typically Superintendent or CIO). The goal is to tie platform engagement to student outcomes and build the renewal case.

Required Data Pulls Before QBR

- Contactability Score trend (current quarter vs. prior quarter).
- Family Engagement Score by school and grade level.

- Attendance rate trend if Attendance Management is enabled.
- Top 5 most-used features and message volume by channel.
- Open support tickets and average CSAT score.

QBR Slide Structure

- Slide 1: Executive summary — 3 wins, 1 area to improve.
- Slide 2: Contactability and engagement benchmarks vs. peer districts.
- Slide 3: Attendance impact (module adopters only).
- Slide 4: Usage highlights — top features, message volume, language breakdown.
- Slide 5: Upcoming product roadmap items relevant to district priorities.
- Slide 6: Renewal investment summary and expansion opportunity.

3. Churn Risk Intervention Playbook

Risk Tiers

Health Score below 40 (Critical): CSM must escalate to Director of Customer Success within 24 hours. Schedule executive alignment call within 5 business days.

Health Score 40–59 (Elevated): CSM conducts weekly check-in. Root cause analysis required within 2 weeks.

Health Score 60–74 (Watch): CSM reviews in next scheduled touchpoint. Document contributing factors.

Common Churn Signals

- Family Engagement Score drops more than 10 points month-over-month.
- P1 or P2 support tickets unresolved for more than 48 hours.
- Staff turnover in Communications Director or IT Director role.
- Renewal date within 60 days and no renewal conversation initiated.
- District submits RFP or requests competitor comparison.

Intervention Steps

- Step 1: Review full account health dashboard in the CSM portal.
- Step 2: Listen call — schedule 30-min call; listen-only agenda, no upsell.
- Step 3: Document root cause in CRM (HubSpot). Assign action owners.
- Step 4: Customized recovery plan — training, feature unlock, exec escalation.
- Step 5: 30-day follow-up review with district stakeholder.

4. Expansion Playbook

Expansion Triggers

- District achieves 95%+ Contactability Score: introduce Intelligence module.
- Chronic absenteeism is a district priority (>15% chronic absent rate): pitch Attendance Management.
- District collects fees via paper or check: introduce Payments & Digital Forms.
- District website is outdated or ADA non-compliant: introduce School Websites.

Expansion Conversation Guide

Lead with data: 'Districts using our Attendance module see an average 3.2% improvement in attendance rates within 6 months.' Reference peer districts in the same state or tier for benchmarking.

5. Escalation Matrix

Support escalations above P2 require CSM involvement. CSMs must be CC'd on all P1 tickets and briefed within 2 hours of P1 ticket creation. Director of CS must be notified for any Strategic or Enterprise district P1.
